To create a series or add a work to it, go to a "work" page. The "Common Knowledge" section now includes a "Series" field. Enter the name of the series to add the book to it. Works can belong to more than one series. In some cases, as with Chronicles of Narnia , disagreements about order necessitate the creation of more than one series. Tip: If the series has an order, add a number or other descriptor in parenthesis after the series title eg. By default, it sorts by the number, or alphabetically if there is no number. If you want to force a particular order, use the character to divide the number and the descriptor. So, " 0 prequel " sorts by 0 under the label "prequel. Series was designed to cover groups of books generally understood as such see Wikipedia: Book series. Like many concepts in the book world, "series" is a somewhat fluid and contested notion. A good rule of thumb is that series have a conventional name and are intentional creations , on the part of the author or publisher. For now, avoid forcing the issue with mere "lists" of works possessing an arbitrary shared characteristic, such as relating to a particular place. Avoid series that cross authors, unless the authors were or became aware of the series identification eg. Also avoid publisher series, unless the publisher has a true monopoly over the "works" in question. So, the Dummies guides are a series of works. But the Loeb Classical Library is a series of editions, not of works. Home Groups Talk More Zeitgeist.
